Comparison of vegetation in dry and wet bog habitats

A comparison of the vegetation in wet and dry areas of a bog. Record the species present in four quadrats from wet parts of the bog and four quadrats from dry parts of the bog. Total the ticks and work out the % occurrence in each area. Complete the conclusion table below.

	Dry Bog Habitat						Wet Bog Habitat					
Quadrat Number/ Plant Name	**1**	**2**	**3**	**4**	**Total**	%	**1**	**2**	**2**	**2**	**Total**	%

Conclusions	**Dry Bog**	**Wet Bog**
Total Number of Species		
Three Dominant Species (>60% frequency)		
Species only Found in one Area		
Species Common to Both Areas		
Environmental Factors influencing each Area
