Irish Peatland Conservation
Council support:

Lodge Bog - Developing for community groups, a best practice model for peatland research, restoration, biodiversity monitoring and community awareness

★ The Community Foundation for Ireland

With funding support from the Community Foundation for Ireland - Biodiversity Fund 2020 work is underway enhancing Lodge Bog as a model for peatland custodians and members of the public to learn skills in peatland management, species monitoring and community engagement. To date the Irish

Peatland Conservation Council (IPCC) have presented over ten primary school virtual visits entitled 'Bogs in the Classroom'. We have also presented, via Zoom, a series of nine virtual talks exploring aspects of peatland management including how to undertake a habitat

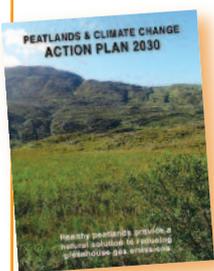

assessment, water level monitoring, species monitoring, drain blocking and the restoration method of *Sphagnum moss* transfer. You can access these talks on IPCC's YouTube channel.

Skill sharing days in water level monitoring, species monitoring and peatland management are underway and if you are interested in getting involved e-mail us at bogs@ipcc.ie.

A new Large Heath butterfly leaflet was designed to raise awareness of this peatland specialist and a new viewing boardwalk was installed on the reserve for all to enjoy and explore peatland management.

Peatlands & Climate Change Action Plan 2030

IPCC have published our 7th action plan, *Peatlands and Climate Change Action Plan 2030*.

This new action plan will guide IPCC's Save the Bogs Campaign for the next ten years. Purchase your copy at www.ipcc.ie or view online at www.ipcc.ie. Promotion of the Action Plan is supported by the Heritage Council under the Heritage Sector Support Grant & the Tides Foundation.

Investigating the carbon stored in Lodge Bog

This Summer on Lodge Bog South the IPCC are sharing our peatland research skill set with members of the local community and peatland custodians by measuring the depth of peat at 32 points and taking a peat core to describe the peat stratigraphy. Knowing this we can then calculate and estimate the amount of carbon stored on the reserve.

Species in Focus

IPCC encountered the Comma (*Polygonia c-album*) on Lullymore West this year. While the butterfly has been recorded in the area, it is the first record on our Butterfly Monitoring Scheme since the monitoring began in 2007. The Comma has recently become established and was first recorded in Ireland in 2000. It is a large vibrant orange colour with a mottled brown pattern, scalloped wings and a white comma on the under hindwing.

The Bumblebee Project on Lullymore West

Volunteers monitoring bumblebees on Lullymore West Image © P. Farrell

With support from Kildare County Council, IPCC have started a weekly 1 hour survey with the help of volunteers over 26 weeks, to monitor bumblebees on Lullymore West. The aim is to build confidence with identification and for the development of a long-term bumblebee monitoring survey on the site. 21 species of bumblebees are found in Ireland and so far we have recorded 34 bumblebees from five different species.

Peatland Education - A new way of learning

While physical visits to schools and visits to the Bog of Allen Nature Centre were restricted as a result of Covid-19, IPCC took the opportunity to explore an alternative way to reach students, we went virtual!

With funding support from the Peatlands Community Engagement Scheme of the Department of Housing Local Government and Heritage, IPCC delivered our virtual bogland experience to 14

schools, in 15 different classes across eight counties reaching 356 wonderful and inquisitive students from 3rd-6th class. Education is key to understanding the importance and value of peatlands, especially in the younger generations today. The participating students learned how peatlands formed, their values, the plants and animals that live on peatlands and also explored the minibeasties that live in bog pools. A follow up survey was sent to participating teachers to get a better understanding of the strengths and weaknesses of the programme. All responses were positive and teachers felt encouraged to explore bogs by organising a field trip with their classes in the future.

You can take Action for Bogs by taking any of these steps

Save an Acre of Bogland Support IPCC's mission to purchase endangered and unique peatlands. Purchase a symbolic share in 1/16th acre of bog and receive a certificate to commemorate your work in saving Irish bogs. €45 (PC116)

Offset Your Carbon Footprint the Bog Way. Stop damaged bogs leaking greenhouse gases into the atmosphere. Your donation will be used to block drains, monitor water levels in bogs and undertake *Sphagnum* moss transplantation. €50 (PC161)

Receive unlimited access to the Bog of Allen Nature Centre, Wildlife Gardens and Nature Reserves in Kildare with a visitor pass. Pass valid for 1 year, for either 5 adults or a family of 2 adults and 4 children €25 PC1138

STOP EMIGRATION OF WILDLIFE Save Our Irish Bogslands

Donation to the Save the Bogs Campaign. Donations to the campaign are used to make a planning observation in favour of bogs or to train volunteers. €20 PC10

**DO SOMETHING DIFFERENT....
Be an IPCC Volunteer**

Image: © P. Farrell

Take your first step to a career in conservation by working on one of our nature reserves as a volunteer doing bird and butterfly surveys, litter pick-ups, water table monitoring, scrub removal and peat free gardening. Be part of the climate change brigade and get involved in IPCC's conservation projects such as *Sphagnum* moss transfer. E-mail bogs@ipcc.ie or phone 045-860133 to get your name on our volunteer list.
